Professional Summary

Data Scientist and Software Developer with 1+ year of experience in the BFSI domain at Tata Consultancy Services and an MSc in Data Science & Analytics from Munster Technological University, Ireland. Proficient in Python, machine learning, statistical modeling, and .NET application development. Skilled in Agile delivery, large-scale system migration, and translating data into actionable insights. Seeking roles in data science, analytics, or software development.

Technical Skills

Programming Languages: Python, JavaScript, C#, SQL, HTML5, CSS3

Data Science & ML: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Statistical Modeling, Regression Analysis, EDA

Frameworks & Tools: .NET Framework, Node.js, Bootstrap, REST APIs, SQLite, MySQL, Git, Figma, WordPress

Methodologies: Agile (Scrum), SDLC, Machine Learning Pipeline, Data Wrangling, Data Visualization

Work Experience

Tata Consultancy Services (TCS) · Pune, India

Sep 2022 – Sep 2023

Assistant System Engineer — BFSI Domain

- Executed a large-scale legacy-to-modern .NET migration for Royal Bank of Canada (RBC), improving application performance, security compliance, and long-term maintainability.
- Developed and refactored C# modules within a mission-critical banking application, adhering to BFSI security and regulatory standards.
- Integrated REST APIs with relational databases and collaborated with cross-functional teams (developers, QA, BAs) to redesign legacy workflows and reduce technical debt.
- Delivered across all SDLC phases — requirements analysis, development, unit testing, and deployment — following Agile (Scrum) with two-week sprint cycles.
- Conducted code reviews and maintained technical documentation for migrated modules to uphold code quality and facilitate knowledge transfer.

Miscot Systems Pvt. Ltd. · Mumbai, India

Feb 2019 – May 2019

Software Trainee

- Built dynamic web pages and integrated REST APIs for a Document Management System (DMS) managing KYC data for AUPGB Bank.
- Contributed to the successful deployment of the banking DMS application, implementing prototype features in collaboration with the core development team.

Education

Munster Technological University (MTU) · Cork, Ireland

2023 – 2024

MSc in Data Science and Analytics

- Relevant Coursework: Machine Learning, Statistical Modeling, Data Visualization, Cloud Computing, Big Data Analytics.
- Capstone Project: Built a Marketing Mix Model (MMM) using Python, Pandas, and regression analysis to measure channel-level ROI and optimise marketing budget allocation.

Theem College of Engineering, University of Mumbai · Mumbai, India

Bachelor of Engineering in Computer Engineering

2019 – 2022

- Major Project: Browser-based File Encryption & Decryption web app using Node.js and a custom cryptographic algorithm — led a team of 3 as project lead.

Diploma in Computer Engineering

2016 – 2019

- Major Project: 3D Role-Playing Game built with Unity Engine. Mini Project: PacMan clone using Visual Basic.

Projects

Marketing Mix Model (MMM)

2024

Python · Pandas · Statsmodels · Matplotlib · Seaborn

- Built a regression-based MMM to evaluate the ROI impact of marketing channels on sales performance, enabling data-driven budget optimisation.
- Performed data preprocessing, feature engineering, and multicollinearity analysis; visualised channel contribution insights using Matplotlib and Seaborn.

File Encryption & Decryption Web App

2022

Node.js · JavaScript · Cryptography · HTML · CSS

- Led end-to-end design and development of a browser-based file encryption tool utilising a custom cryptographic algorithm, ensuring all processing remained local with zero server-side data exposure.
- Architected the full application stack — UI, encryption/decryption pipeline, and file I/O — and managed delivery as Team Lead.

Ananya Garments – Business Website

2022

HTML · CSS · JavaScript · SEO · Digital Marketing

- Developed and deployed a performance-optimised, mobile-responsive static website for a garments business, improving page load speed and user experience.
- Planned and executed a digital marketing strategy (SEO, social media) to establish an online presence and drive organic traffic.

Certifications

- Python for Everybody Specialization — University of Michigan, Coursera (November 2021)
- Complete Web Development Course — Eduonix Learning Solutions (October 2021)

Achievements & Activities

- Presented a technical paper on Open Source Software at a state-level paper presentation competition, Vidyalkar Polytechnic, Mumbai.
- Served as Event Head for the JASHN-E-THEEM Programming Quiz, coordinating a competitive programming event for 100+ participants.
